ART™ Day Activator

ART™ Essentials System Code 3131

(Includes: Day Activator, Night Reconstructor, and Foaming Cleanser)

Body Systems Supported

Skin

Benefits

Young Living's Age Refining Technology (ART) Day Activator contains the powerful Photolyase enzyme that uses light to help renew DNA. As little as 30 minutes of moderate light provides a significant amount of energy for the enzyme, which allows the skin to be 60% more effective at DNA renewal. Day Activator combines the skin revitalizing power of essential oils with a proprietary Anti-Aging Peptide Complex, which helps even skin tone, reduce the look of fine lines and wrinkles, diminish age spots, support the skin's collagen structure, and increase the elasticity of your skin. This light-bodied, water-based face and neck cream absorbs quickly and is perfect for wearing underneath makeup or sunscreen.

Ingredients

Deionized water; pentylene glycol derived from coconut (*Cocos nucifera*) and palm for moisture retention; glycerin (from coconut and vegetable sources) and glyceryl stearate (derived from coconut and palm) to moisturize and stabilize the formula; betaine from sugar beets (*Beta vulgaris*) to increase the moisture capacity of the skin; *Lycium barbarum* seed oil (adding the nourishing properties of Ningxia wolfberries); cetearyl alcohol (a plant wax derived from coconut) as an emollient (to soften and soothe); the unparalleled skin support and nourishment of the essential oils of frankincense (*Boswellia carterii*) and sandalwood (*Santalum album*); caprylic/capric triglycerides (from coconut) as a rich emollient; a plant-based (plankton), light-activated enzyme complex containing Photolyase (refining and replenishing), meadowfoam seed oil and shea butter (moisturizers); and vitamins A, C, and E for antioxidant protection.

How to Use

Apply in the morning after cleansing. Using fingertips, massage a generous amount (usually 2 to 4 pumps) of Day Activator over face and neck regions as needed. Suitable for all skin types. For maximum benefit, Day Activator should be used with Young Living's Gentle Foaming Cleanser and Night Reconstructor Cream.

Important Information

Now you can look as young as you feel! Too much sun can cause skin damage, including fine lines, wrinkles, and age spots. Using the innovative Photolyase enzyme, Day Activator enhances your body's ability to restore DNA and reduce damage in the future. An exclusive Anti-Aging Peptide Complex, featuring Matrixyl™ 3000 and vitamin C, reduces the look of fine lines and wrinkles by improving the elasticity of the skin. Add the power of the legendary wolfberry seed oil, known for its skin hydrating properties, and you have the formula for a truly unique and effective day cream. This light-activated formula also delivers a proprietary blend of pure essential oils to help sustain DNA recovery while providing a natural, light, refreshing fragrance. Make Day Activator part of your skin care routine and help yourself to ageless beauty.
